Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/543,107	Applicant(s) LINKE ET AL.	
	Examiner Christopher P. Schwartz	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement has been received and considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 11-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bieker et al. '874 E in view of Thiel et al. and Kay et al.

Regarding claims 11-30 Bieker et al. shows a spring and fastening arrangement similar to what is discussed on pages 1 and 2 of applicant's specification with respect to publication EP 0534987. See Bieker et al. figure 1 the slot in the caliper in the area above the closing plate 41.

Lacking in Bieker et al. is a specific description of the spring and clamping arrangement and a closing plate 41 having a slot for receiving an end of the retaining clamp.

Thiel et al. is relied upon for showing a spring (28,54,56) and clamp (36,38,40) arrangement known in the art.

Kay et al. is relied upon to show a similar spring and clamp arrangement at 34,36, and 40 and that it is known to make singular parts plural with regards to the fastening arrangement for the clamp ends 40. Compare figure 2B with figure 5A,5B and note the fastening arrangement at 114,116.

One having ordinary skill in the art at the time of the invention would have found it obvious to have substituted one of the known spring arrangements of either Thiel et al. or Kay et al. for that of Bieker et al. as a simple substitution of one well known pad spring arrangement for another. Similarly it would have been obvious to the ordinary skilled worker in the art to have simply made the plate of Bieker et al. (to have extended it upwards) to include a slot to hold an end of the clamping device so that the pad spring and clamping arrangement could be more easily adapted to different style calipers.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 571-272-7123. The examiner can normally be reached on M-F 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rob Siconolfi can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
